

Soothe those slightly raw mornings-after with a lush, expansive reverb from Landlord FX. The Banging Hangover understands your pain and wants to bathe you in gentle tides of ambience. The Banging Hangover offers up three types of reverb in a tough metal package with a true bypass switch for quality and strength to match your most intense 'recovery periods'.

Operating Instructions

- 1. TRUE BYPASS SWITCH:** Press to engage and wash your sound with beautiful, clean reverb.
- 2. LED INDICATOR:** Displays the pedal's status: a light LED means effect is ON.
- 3. REVERB:** Determines the length of the Reverb's tail. This also increases the overall intensity of the reverb effect from a mild coastal tide to an epic wave: adjust according to level of hangover.
- 4. TONE:** Determines the overall brightness of the 'verb. Go counter clockwise to warm the tone up and clockwise for brighter frequencies.
- 5. MIX:** Choose how much lush reverb you hear next to your dry guitar tone.
- 6. INPUT:** Connect your guitar here.
- 7. OUTPUT:** Send your Banging Hangover straight to your amp.
- 8. POWER ADAPTER INPUT:** Connect any standard 9V centre negative adapter to begin curing your hangover.
- 9. MODE SWITCH:**
ROOM – A natural sounding reverb of a small to medium sized room.
PLATE – Brings an echoey, Plate-style reverb with metallic overtones.
SPRING – The classic sound of a vintage amplifier's onboard Spring reverb.

Specifications

- Output: 1/4" Monaural Jack (Impedance: 100 Ohms)
- Power Supply: DC 9V (Plug polarity is positive on the barrel and negative in the centre)
- Working Current: 100mA
- Dimensions: 95(D)*45(W)*48(H)mm
- Weight: 273g (With box)
